• SECOND MISSION BRIEFING •

《MISSION SUMMARY》

Time has marched on since the success of the "First Mission"-- the deployment of the special strike force "Peregrine Falcons (PF Squad)" into actual battle. Your services are required again. Government forces have received information that the special combat squad "Phantom," led by the rebel army's Commander Makuba, has once again resumed activities. They have reportedly taken a considerable amount of government forces hostage, and we have subsequently learned an even more terrifying truth. Rebel forces have made contact with an alien race and are proceeding with the production of weapons employing technology beyond our comprehension. The situation is grave! It's up to you to wage a solo attack on the enemy base, and save those hostages!!!

《BASIC RULES FOR 2ND MISSION》

- When the Life Gauge is depleted by taking hits from the enemy, etc., the game ends. When your life power begins to fall, look for items and grab them to keep fighting.
- Even when the Metal Slug (Tank), the Slug Flyer (Fighter plane) or the Slug Sub (Submarine) are destroyed, your character stays alive and play proceeds to another stage. So don't give up!
- There is a limit to ammunition for some weapons (other than the starter weapons). Pick up gun clip items to replenish bullet supplies.
- When you find the prisoners of war during game stages, rescue them! The rank of your character will rise based on the number of rescued prisoners. (The number of Time Attack stages increases with the rise of your character's rank)
